Re: Mine Plan Reclamation Variance and Release Request, Topaz Mine, M/023/003,
Juab County Utah

Dear Mr. Hedburg:

Upon mid-year review of the reclamation work associated with the mine, it has come to attention that a written request from last year's report is still pending. Please review the 1993 "Annual Report of Mining Operations" submitted to your office on January 31, 1994. The letter contained in the report requesting variance from revegetation and release from reclamation liability has not been answered.

Please accept this second request for variance and release. A meeting could be arranged if further information or discussion is needed. Also, it has been some time since the mine site has been inspected by your office. A field trip could help to satisfy the request for variance and release. It would also bring the dialog between DOGM and Brush Wellman up to date. Mr. Rody Cox of the Bureau of Land Management, Fillmore office, has also been invited to participate in the suggested field trip and reclamation site inspection.

I look forward to your reply concerning these matters. Please feel free to contact me at (801) 864-2701, ext. 211.

Sincerely,

Greg Hawkins
Mine Manager
